dec 31 2021 i ve read about the difference between double precision and single precision however in most cases float and double seem to be interchangeable i e using one or the other does not

c float double double float
float 3 1415926535 float

format If in printf was not supported in old pre c99 versions of c language which created superficial inconsistency between format specifiers for double in printf and scanf

oct 20 2017 from what i have read a value of data type double has an approximate precision of 15 decimal places however when i use a number whose decimal representation repeats such as

feb 6 2014 i understand that float has a smaller range than double making it less precise and from what i understand long double is even more precise so my question is why would you want to

jul 2 2009 a double has a much higher precision due to it s difference in size if the numbers you are using will commonly exceed the value of a float then use a double several other people have

apr 22 2015 possible duplicate long double vs double i am unable to understand the difference between between long double and double in c and c can anyone help

promise but in c when calling scanf and printf the notation used to specify a double is lf and that stands for long float right so while a float is less precise than a double a long float

the long double function prototypes are identical to the prototypes for their double counterparts except that the longdouble data type replaces the double data type the long double versions of these

494 a double is not an integer so the cast won t work note the difference between the double class and the double primitive also note that a double is a number so it has the method intValue which
